

Discovery is not evidence

CONCEPTUAL · NON-EMPIRICAL

Discovery yields candidates; admitted evidence follows an explicit extraction route before deterministic validation and verification.

DISCOVERY IS NOT EVIDENCE

Discovery stops at the queue. Only admitted evidence passing an explicit extraction route, deterministic validation and independent verification may reach a supported claim.

Source: local Section 2.5 packet + project contracts; exact local pages/files/hashes are in the TXT and provenance.

Author: Faye Niu · LIT-F2 · conceptual, non-empirical, not a result; no live coverage, latency, cost, token-use or performance claim.
