

Fixed workflow and verification state machine

CONCEPTUAL / NO RESULTS

Bounded roles produce auditable records; only named review can authorise controlled export.

Source note: author synthesis of stable repository workflow, verifier, report, approval/export and local-test contracts; conceptual and non-empirical.

Design context: Gao et al. (2023a), PDF pp. 3-4, 10; NIST AI RMF (2023), pp. 33-35; Amershi et al. (2019), pp. 3-5.
